

How to uninstall

Grid Calculator Publishing Edition 2025 (and later) by Designers Bookshop

Note: This guide is written for version 2025, but it applies to other versions as well. Simply replace “2025” with the version you wish to uninstall.

1. Quit Adobe InDesign before proceeding.
2. Open the plug-in folder:
/Applications/Adobe InDesign 2025/Plug-Ins/**Grid Calculator Publishing Edition**.

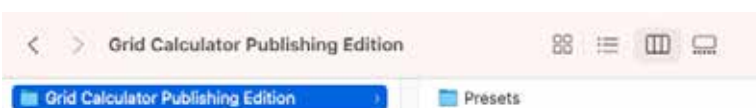

3. Launch the application: **Activator 2025**.
 - If a license (or demo) is currently active, click Deactivate (otherwise, skip to the next step).
 - **Deactivating the license allows you to activate it on another computer.**
4. From the menu bar, choose: **Activator 2025 > Delete Activation Files**.

Note: This will remove license files. It is also recommended if you're migrating to a new computer or restoring your system using Time Machine, so you can activate your license again with a valid license file. After deleting the activation files, please run the installer again and re-activate plug-in.

5. To delete saved presets (layouts), remove the following folder (optional):
/Documents/**Grid Calculator Publishing Edition**.

6. Finally, delete the actual plug-in and its folder so it no longer loads in Adobe InDesign:
/Applications/Adobe InDesign 2025/Plug-Ins/**Grid Calculator Publishing Edition**
(same folder shown in Step 2).
