About ScribeDOOR

ScribeDOOR adds the ability to edit and treat text in a wide range of languages: Arabic, Azeri, Bengali, Farsi, Georgian, Greek, Gujarati, Hebrew, Hindi, Kannada, Kazakh, Khmer/Cambodgian, Lao, Malayalam, Marathi, Oriya, Punjabi, Tamil, Thai, Urdu, Vietnamese and Roman languages (English, French, ...).

ScribeDOOR can be installed in all Roman Illustrator versions (English, French, Italian, Czech, Polish,...). In localized user interfaces (except French), only the English user interface will be available for the ScribeDOOR panel and tools.

Activation process on ScribeDOOR for Illustrator

Activation

- When launching Illustrator CC after installing ScribeDOOR for Illustrator, the following dialog is displayed.
- You have the choice to enter your license (serial number) and then to activate permanently ScribeDOOR.
- You can also use ScribeDOOR for 7 days in trial mode. In trial mode, this Welcome Screen will be displayed at each launch of Illustrator.
- To activate permanently ScribeDOOR, enter your serial number and click on "Continue".

- If your trial version has expired, you can display this window by selecting Windows>ScribeDOOR>Activation>Activate ScribeDOOR

ScribeDOOR in Illustrator menu

Working with complex scripts

In Windows Vista and Windows 7, the support of complex scripts is included in the standard installation.

In Windows XP, you must verify the option “Install files for complex scripts and right-to-left languages” in Supplemental language support and change the settings if you want to enable Arabic, Hebrew, and South Asian languages in your system.

For Macintosh, due to a system limitation, the primary language in system preferences>international or Language and Text (Snow Leopard) must be other than Arabic, Hebrew or Farsi.

Installing a language keyboard

Whether you are working in Mac OS or Windows, you need to install the required keyboards for the languages you want to work with in your Operating System.

ScribeDOOR adds the following keyboards in Mac OS: Khmer, Lao, Sinhala, Urdu, Telegu. These keyboards can be displayed in system preferences>international or Language and Text (Snow Leopard)

Mac OS 10.7 adds support for Kannada, Telugu, Bengali/Assamese, Malayalam, Sinhala, Oriya, Lao, Khmer and Burmese. So, on Mac OSX 10.7, ScribeDOOR installs only Lao keyboard.

Font considerations

Make sure to also choose an appropriate font in the Font submenu of the Type menu or in the font pop-up menu of the Character or Control Palette of Illustrator.

An appropriate font means a font containing the character of the language in which you would like to type. ScribeDOOR installs WinSoft Pro which supports Roman, Arabic or Hebrew.

You may also use the following fonts :

Platform	Arabic	Hebrew
Windows	Traditional Arabic Simplified Arabic Arabic Transparent Simplified Arabic or multiscript fonts like Arial- Times New Roman	Ahroni David FrankRuehl Regular Levenim MT or multiscript fonts like Arial- Times New Roman
Macintosh	Geezah Pro Baghdad Al bayan	Arial Hebrew Corsiva Hebrew New Penim MT Raanan

South Asian fonts

For each language, appropriate fonts must be installed.

Below is the list of fonts that can be used with each language. We remind you that best results will be given with fonts provided with Windows Vista (unicode 5.0) and Windows 7 (unicode 5.1).

Thai	Angsana
Lao	Dok Champa
Devanagari	Mangal
Bengali	Vrinda
Gurmukhi	Raavi
Gujarati	Shruti
Oriya	Kalinga
Tamil	Latha
Telugu	Gautami
Kannada	Tunga
Malayalam	Kartika
Tibetan	Microsoft Himalaya
Khmer	DaunPenh

Sample text in South Asian languages

Thai: ภาษาไทย

Lao: ປະເທດລາວ

Devanagari: हिन्दी इत्यादि।

Bengali: বাংলা ভাষা

Gurmukhi: ਗਜਿਸਟ੍ਰੋਸਨ

Gujarati: અા પાણ જુઓ

Oriya: ରାଜ୍ୟର ଆନୁଷ୍ଠାନିକ ଭାଷା

Tamil : சொன்னால்

Telugu: ఇబ్బందులపాలవ్వాలి

Kannada : ಸೇರಿದವರಾಗಿದ್ದಾರೆ

Malayalam: വെളിച്ചങ്ങളായിരിക്കട്ടെ

Tibetan: བོད་ཡུལ་

Khmer: ព្រះរាជាណាចក្រកម្ពុជា - វិទ្យាស្ថាន

ScribeDOOR

By Winssoft International

World-Ready Composer

Giving access to the “World-Ready Composer” is one of the key features of ScribeDOOR. ScribeDOOR uses WRServices technology (a component developed by WinSoft International) which was integrated in most Adobe products for the Arabic, Hebrew and Farsi languages. The default composer (Adobe Every Line Composer) only supports Roman, Central European, Greek and Cyrillic scripts. With World-Ready Composer, **you will have the ability to type in complex languages** like Arabic, Hebrew or South Asian languages (Hindi, Telugu, Lao, Thai, ...). World-Ready Every Line Composer supports also the same languages as Adobe Every Line Composer. If you try to type Arabic or Hebrew text with Adobe Every Line Composer, it will not work correctly.

How to apply World-Ready Composer?

You have the possibility of either converting all of the text frames of an existing document or working at the paragraph level.

Apply World-Ready Composer for all text frames

Select “Apply World-Ready Composer...” in the contextual menu of the ScribeDOOR palette. You will now be able to type in complex script languages in any of your document’s text frames.

Apply World-Ready Composer for a paragraph

If you are in a normal text frame, you can switch any paragraph to a World-Ready Composer paragraph. Select the paragraph you want to convert and select World-Ready Every Line Composer in the composer pop-up.

Paragraph direction

It is important to understand and differentiate between “paragraph direction” and “paragraph alignment”. “Paragraph direction” controls the order of text and neutral characters (punctuation) inside a paragraph. “Paragraph alignment” controls the placement of the whole line in reference to the left and right boundaries of the text frame. Paragraph direction and alignment are independent of each other. For example, if your text is in Arabic, Hebrew, Syriac, Thaana, Azeri, ...etc, use a “Right-to-Left” paragraph direction, otherwise, use the “Left-to-Right” paragraph direction option.

The paragraph direction can be set with the paragraph direction icon in the ScribeDOOR palette. To see how the “Right-to-Left” option affects the appearance of the text, read through the following examples.

Examples of paragraph direction applied to Arabic or Roman text

Left-to-Right paragraph direction applied to Roman text: The alignment is correct and neutral characters are correctly situated. The Arabic text is correctly situated inside the Roman text.

The lemon (الليمون) is the common name for Citrus limon. The reproductive tissue surrounds the seed of the angiosperm lemon tree. The lemon is used for culinary and nonculinary purposes throughout the world.

Right-to-Left paragraph direction applied to Arabic text: The alignment is correct and neutral characters are correctly situated. The Roman text is correctly situated inside the Arabic text.

ثمرة تنتمي إلى عائلة الليمون (Lemon) الحمضيات، بيضاوية الشكل، صفراء اللون. نبتة الليمون في العادة تكون صغيرة، أعلى طول ممكن أن تصل إليه هو ٦ أمتار تقريبا. مذاق الليمون حامض. وعصير الليمون واللبن شائع الاستخدام في الطبخ، بالإضافة إلى أن الليمون يستخدم لأضافة النكهة إلى بعض المشروبات مثل مشروب الليمون (الليمونادة) أو بعض المشروبات الغازية.

When applying the wrong settings

The text is not aligned correctly and the flow of text is right-to-left. As a result, the punctuation and the text in Arabic are incorrectly situated.

is the common name for (الليمون) The lemon Citrus limon. The reproductive tissue surrounds the seed of the angiosperm lemon tree. The lemon is used for culinary and nonculinary purposes throughout the world

The text is not aligned correctly and the flow of text is left-to-right. As a result, the punctuation and the Roman text are incorrectly situated.

ثمرة تنتمي إلى عائلة الليمون (Lemon) الحمضيات، بيضاوية الشكل، صفراء اللون. نبتة الليمون في العادة تكون صغيرة، أعلى طول ممكن أن تصل إليه هو ٦ أمتار تقريبا. مذاق الليمون حامض. وعصير الليمون واللبن شائع الاستخدام في الطبخ، بالإضافة إلى أن الليمون يستخدم لأضافة النكهة إلى بعض المشروبات مثل مشروب الليمون (الليمونادة) أو بعض المشروبات الغازية.

Story direction

A story is any individual text frame or set of threaded text frames. The story direction only affects the order in which multi-column text flows. This option will be set for the whole story even if the story is split into multi-thread text frames. The "Story Direction" must be set to Right-to-Left for complex script text and vice versa for Roman text.

Arabic text with default Right-to-Left story direction:

3	2	1
في الحمى وارتفاع درجة الحرارة ويزيد في ادرار البول ومقاومة التسممات وطرد الديدان والغازات والتعفنات المعوية، ويعتبر الليمون مروبيا للعطش ومنعشا في الصيف سواء كان طبيعيا أو مغليا.	الاسنان وسقوطها وفي تضמיד الجروح والقروح ونزيف الانف وترميم الانسجة، ومن خصائصه أيضا توفره على املاح وحوامض عضوية تساعد على احتراق الفضلات والاملاح، لذا يوصف في حالات الروماتيزم والنقرس وارتفاع الضغط الشرياني وتصلبها والدوالي وعرق النساء والالام العصبية المختلفة كما يستعمل	يعتبر فيتامين ج من أهم المواد الواقية من مرض الاسقربوط. كما يعمل على تقوية جدران الأوعية الدموية. يستعمل الليمون كدواء شاف من الاوبئة والأمراض كالكوليرا والتيفوئيد والروماتيزم والنقرس والانتانات المعوية وامراض الكبد والانفلونزا والسعال. والليمون مفيد في تخلخل

If the wrong story direction is applied:

1	2	3
يعتبر فيتامين ج من أهم المواد الواقية من مرض الاسقربوط. كما يعمل على تقوية جدران الأوعية الدموية. يستعمل الليمون كدواء شاف من الاوبئة والأمراض كالكوليرا والتيفوئيد والروماتيزم والنقرس والانتانات المعوية وامراض الكبد والانفلونزا والسعال. والليمون مفيد في تخلخل الاسنان وسقوطها وفي تضמיד	الجروح والقروح ونزيف الانف وترميم الانسجة، ومن خصائصه أيضا توفره على املاح وحوامض عضوية تساعد على احتراق الفضلات والاملاح، لذا يوصف في حالات الروماتيزم والنقرس وارتفاع الضغط الشرياني وتصلبها والدوالي وعرق النساء والالام العصبية المختلفة كما يستعمل في الحمى وارتفاع درجة الحرارة ويزيد في ادرار البول	ومقاومة التسممات وطرد الديدان والغازات والتعفنات المعوية، ويعتبر الليمون مروبيا للعطش ومنعشا في الصيف سواء كان طبيعيا أو مغليا.

Character direction

Illustrator automatically calculates the default character direction for the paragraph direction as well as to the surrounding characters according to the language and/or script of the character you have defined in the Illustrator character palette.

In some very limited cases, some characters may not display in the right position. Positioning the Right-to-Left or Left-to-Right character direction in the character palette, in order to force the direction of the misplaced character, will correct this.

Justification for Arabic on CS5.x version

When working on full justified Arabic text, you can choose three types of justification: Standard, Arabic or Naskh — allowing you the creative freedom to choose the settings that give you the best results.

• Standard

Refers to the usage of inter-word and inter-character spacings specified for the Paragraph Style Sheet in order to get justified paragraphs. In case ScribeDOOR is not able to justify the paragraph with the settings in the Style Sheet, it will overrides them.

• Arabic

ScribeDOOR will first try to justify a line with the settings in the style sheet, after which the extra space left is divided by the number of character positions that can accommodate a kashida. ScribeDOOR will add a number of kashidas equal to the obtained result.

• Naskh

Allows you to apply the Naskh justification rules to any font whether or not it is a Naskh font. The results will vary depending of the type of fonts.

Justification Types:

Standard, Non-forced

Justification for Arabic on CC version

When working on full justified Arabic text, you can choose four types of justification: Short, Medium, Long or Stylistic — allowing you the creative freedom to choose the settings that give you the best results.

These types of justification are representing the width of kashidas used to fully justify your text.

ScribeDOOR

By Wmsoft International

Kashidas

Kashidas are a way of elongating Arabic characters and therefore decreasing spaces between words, giving better full justification of the text.

Kashidas can be turned on or off with the corresponding check box.

With kashidas

الليمون ثمرة تنتمي إلى عائلة الحمضيات،
 بيضاوية الشكل، صفراء اللون. نبتة الليمون
 في العادة تكون صغيرة، أعلى طول ممكن أن

Without kashidas

 بيضاوية الشكل، صفراء اللون. نبتة الليمون
 في العادة تكون صغيرة، أعلى طول ممكن أن

Digits

You can choose the language in which you want your numeric digits to be typed. The Default setting means that the numbers will be in the same language as that of the previous character. Otherwise, you can choose between Arabic, Hindi, Farsi and all South Asian numbers.

Digits for Arabic and South Asian languages

Arabic : 0123456789

Farsi: ۰ ۱ ۲ ۳ ۴ ۵ ۶ ۷ ۸ ۹

Hindi-arabic: ० १ २ ३ ४ ५ ६ ७ ८ ९

Thai: ๐ ๑ ๒ ๓ ๔ ๕ ๖ ๗ ๘ ๙

Lao: ໐ ໑ ໒ ໓ ໔ ໕ ໖ ໗ ໘ ໙

Devanagari: ० १ २ ३ ४ ५ ६ ७ ८ ९

Bengali: ০ ১ ২ ৩ ৪ ৫ ৬ ৭ ৮ ৯

Gurmukhi: ੦ ੧ ੨ ੩ ੪ ੫ ੬ ੭ ੮ ੯

Gujarati: ૦ ૧ ૨ ૩ ૪ ૫ ૬ ૭ ૮ ૯

Oriya: ୦ ୧ ୨ ୩ ୪ ୫ ୬ ୭ ୮ ୯

Tamil : ௦ ௧ ௨ ௩ ௪ ௫ ௬ ௭ ௮ ௯

Telugu: ౦ ౧ ౨ ౩ ౪ ౫ ౬ ౭ ౮ ౯

Kannada : ೦ ೧ ೨ ೩ ೪ ೫ ೬ ೭ ೮ ೯

Malayalam: ൦ ൧ ൨ ൩ ൪ ൫ ൬ ൭ ൮ ൯

Tibetan: ༠ ༡ ༢ ༣ ༤ ༥ ༦ ༧ ༨ ༩

Khmer: ០ ១ ២ ៣ ៤ ៥ ៦ ៧ ៨ ៩

Digits can be set by selecting text or by defining paragraph or character styles.

Diacritic positioning

Short Arabic vowels are floating diacritics, written either over or under the consonants. Therefore, it is important in desktop publishing for the diacritics to be properly placed over consonants, both horizontally and vertically.

When using an OpenType font in your layout you can use the OpenType setting to use the position specified by the font's designer. This setting is recommended for all recent opentype fonts.

Whether your font has built-in diacritic information or not, you can force Illustrator, to use its own algorithm to position the diacritics.

Update character and paragraph style

With ScribeDOOR, you have the opportunity to update the current paragraph style with any ScribeDOOR feature or function.

For example, if you want to apply these ScribeDOOR attributes to paragraph style 1:

- Adobe World-Ready Paragraph Composer
- Right-to-Left paragraph direction
- Naskh justification

- Right-to-Left story direction

1) Select these options in the ScribeDOOR palette

2) Select the paragraph style or character style you want to update

3) Select the update Paragraph or Character Style in the contextual menu of the ScribeDOOR palette

Insert special characters

The contextual menu "Insert Special Character" gives you the ability to insert four Hebrew characters (Geresh, Gershayim, Maqaf, Sof Pasuk) and one Arabic character (Kashida), as well as a Right-to-Left or Left-to-Right dash. To insert these characters just select them in the contextual menu of the ScribeDOOR palette.

Usage of ZWJ and ZWNJ within complex scripts.

The Unicode norm defines two special characters, that are specially useful to complex scripts :

The ZWJ (Zero Width Joiner, unicode 0x200D)

The ZWNJ (Zero Width Non Joiner, unicode 0x200C)

These two characters have basic behaviours, that are as follow :

The ZWJ breaks a potential conjunction, it also acts as a combining character in cursive scripts.

For instance:

In Arabic, you can get the medial form of a character by surrounding it with ZWJ :

ب becomes **ب** when surrounded by ZWJ

In Hindi, the conjunct:

क+ष+न = क्ष्न becomes क्ष्ण when a ZWJ is inserted after the first consonant.

In Telugu, the conjunct:

క + ష + ని = క్షి becomes క్ష + ష + ZWJ + ని = క్షి or క్ష + ZWJ + ష + ని = క్షి depending on the position of the ZWJ.

Besides these common usages, Unicode also defines special usage that are specific to a particular script. For instance, in Bengali: ঞ + য = ঞ becomes ঞ + ZWJ + য = ঞয

The ZWNJ primary usage is to force the rupture of a syllable, for instance दिन becomes क्षि when a ZWNJ is inserted after the first consonant. The first consonant is then isolated from the rest of the syllable, allowing the i matra to come after this first consonant.

The ZWNJ also has special usage specific to a particular script, for instance, in Malayalam, മ becomes മ് with the addition of a ZWNJ.

Usage of ZWS for Thai, Lao and Khmer.

For the languages which don't use a space character between words, it is recommended to use the character ZWS (Zero Width Space, unicode 0x200B) between words to allow the Composer to work properly and produce correct line-breaking. This character is usually easily available on the keyboards used for such languages (for instance the Khmer keyboard provided on Macintosh maps this character to the space bar).

ScribeDOOR
By Winssoft International

Selection helper (Only available with CS5.x version)

ScribeDOOR's "Selection Helper" is a simple and effective tool for editing complex text. In this version of ScribeDOOR, this feature is only available in Arabic, Hebrew and Roman text. By presenting each letter separately, the selection and transformation is made extremely easy.

Just mouse over the letters you want to select in the “Selection Helper” palette.

Known issues

Unicode markers

Some unicode markers like :

- left-to-right embedding
- right-to-left embedding
- pop directional forming
- left-to-right override
- right-to-left override

should be displayed as hidden characters. Instead, they are displayed and printed as arrow. This issue is linked to Illustrator US version.

South Asian languages

We strongly recommend to use Vista or Windows 7 with last fonts supplied with this system to get correct results for text shaping, ligatures, etc.

Macintosh

In order to use complex scripts keyboards (Arabic, Hebrew, etc), international system settings must be set to English or Roman language.

Support

If you see any issues, contact us via this form:

<http://support.winsoft-international.com/>.

We will reply to you within 48 h and we will make changes and service improvements based on your reports.
